

UnisLink Registry Service

Supercharged, Scalable **MIPS Reporting**
Solutions for Providers of Any Size

Medicare Quality Metrics Capture and Reporting = Make or Break.

Value-based care under Medicare's Merit-based Incentive Payment System (MIPS) demands quality from start to finish.

Missing one step in the process can lead to loss of revenue and even penalties for your practice. UnisLink's integrated registry service helps you get CQM & MIPS capture and reporting right—fostering healthier patients and maximizing revenue.

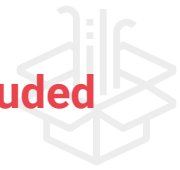

UnisLink Registry™: Your Integrated MIPS Dashboard

UnisLink Registry™ is a complete, modular solution for Individual MIPS Eligible Clinicians, Provider Groups, and EHR Vendors.

Clients can choose support for any or all of these available categories:

- **Quality** – 216 eCQM + MIPS CQM Measures
- **Improvement Activities** – All 106 activities
- **Promoting Interoperability** – All 37 measures

What's Included

- + **Web-based dashboard**
shows MIPS scores, potential incentive or loss value, measure-wise performance rates and allows drilldown to provider, measure, and patient-level granularity
- + **Detailed performance reporting**
with an always available web interface and feedback updates at least 4-times per year
- + **Streamlined Provider/Office Staff interface** to review and complete performance information and attest to Improvement Activities and Promoting Interoperability objectives
- + **Built-in data validation**
with direct reporting/submission of MIPS Quality Measures, eCQMS, Promoting Interoperability and Improvement Activities Measures

Features

- + **Detailed performance display**
including eligible population, numerators, and any exclusions and exceptions
- + **Filterable to measure performance**
for the entire patient population or only for ACO beneficiaries tagged by CMS attribution lists
- + **Identifies gaps in patient care**
relative to targeted Quality Measures
- + **Multi-level reporting**
at organizational, individual practice, provider, and patient levels
- + **Assignable user permissions**
based on role and access level
- + **Goals and benchmarks**
setting at organizational, practice, and provider levels
- + **Tracks measure performance trends**
at organizational, practice and provider levels.

We'll Give You the Keys to MIPS Success

UnisLink delivers our best-in-market solution to providers through an account optimization model that can be tailored to fit your needs, scaling to be just right, whether you are a solo provider, or a large multi-division, multi-location group practice.

Our registry service will take you easily from start to finish, guiding you around every curve along the way with:

- + **ACO/APM reporting**
including GPRO and CMS Web Interface Measures reporting
- + **CPC+ Reporting**
our fully certified eCQM engine combines QRDA files from multiple EHRs

Add-on Offerings

- + **Full-blown analytical dashboards**
and reports enabling proactive care and quality gap management
- + **Automated patient-outreach**
to patients at risk of not meeting quality measures or activities
- + **Custom data extraction**
from clinical data sources or practice management systems
- + **Bespoke data query**
and reporting options

- ✓ **Easy data and demographics intake**
options including form intake, flat file exports, direct database extractions, and ready connectors for EHRs like Amazing Charts and Practice Partner
- ✓ **Measures calculated from quality**
codes or raw clinical data
- ✓ **Compliance and legal documentation**
including Consent, BAA, and materials to support CMS mandated audits

A quick conversation is all it takes to get you started on the road to a supercharged future.
